A14.1 Network Interface Equipment

A14.1.1 General

- A. Network Interface equipment may be provided in connection with PBX, ESSX[®] service, ESSX-1, and all other classes of main station service. (C)
- B. Services provided on complex wiring must be directly connected to the telecommunications network through Company installed Network Interface equipment as specified in, or authorized by, Part 68 of the FCC Rules and Regulations.
- C. For outdoor locations weatherproof network interface equipment is available at the rates and charges quoted in A14.1.2. following.
- D. The Network Interface is provided to allow the modular connection of premises inside wire to the Access Line. The Network Interface is not to be routinely considered as a jack for the connection of telephone equipment to the Access Line except for normal testing purposes.

A14.2 Toll Restriction (Battery Reversal In Central Office)

A14.2.1 General

Toll restriction arrangements (battery reversal) may be provided where suitable facilities are available in the Central Office for use with customer premises equipment to affect toll denial service on each line or trunk so arranged. However, this arrangement will be furnished only where the customer keeps at least one line and/or station available for access to a toll network.

Additional customer-provided premises terminal equipment may be required. Toll restriction is not compatible with certain customer premises equipment.

A14.2.2 Rates

Toll Restriction Arrangement (battery reversal) from certain Central Offices

	Installation Charge	Monthly Rate	Basic Termination Charge	USOC
(a) Per central office line or trunk arranged, each	\$200.00	\$14.50	\$-	TDU

A14.3 Break In Rotary Number Group

A14.3.1 General

Break In Rotary Group is an arrangement whereby certain central office lines or PBX trunks may be temporarily removed from the Rotary Number Group by means of a key and associated equipment at the subscriber's premises which, through the use of a signaling channel, operates control equipment in the central office.

A14.3.2 Rates

The following rates apply for furnishing a break in a Rotary Group Number. The basic termination charge applies to 60 months.

(a) Common Equipment for the first ten lines	-	16.50	280.00	GHR
(b) For each additional ten lines controlled	-	13.75	200.00	GHS
(c) Change in point of break in Rotary Number Group. Appropriate service charges in Section A4. are applicable.	-	-	-	NA
(d) Signaling channel If appropriate, rates and charges specified in the Company Private Line Service Tariff are applicable.	-	-	-	1L3++

A14. AUXILIARY EQUIPMENT

A14.15 Line Out-Of-Service Feature

A14.15.1 General

- A. The Out-Of-Service Feature is designed to provide control of a single telephone line in a hunting group. By means of customer-provided equipment at the subscriber's premises, which is used to activate a control channel, the line made busy is by-passed until returned to normal by the customer. Where more than one line is to be taken out of service and repeated attempts could overload telephone switching equipment, a voice recorded announcement should be provided.
- B. At the customer's option, the Line Out-Of-Service Feature may be provided by one of the following.
1. Answer-Only Arrangement
The telephone line to be made busy is modified for answer-only service. By presenting an off-hook condition the line is busy. No additional charge is made for this arrangement.
 2. Third Wire Control Arrangement
The line made to appear busy is arranged as (normal) two-way service. A control signal from the station line is transmitted over a signaling channel to equipment in the central office which makes the line appear busy.

A14.15.2 Rates

A. Control Equipment

1. Per line
